- \*1 Face seal fitting \*2 Compression fitting \*3 With 1/4 (R, NPT, G) M5 female threaded
- \*4 A block parameter or data storage function is provided with the IO-Link compatible type.
- \*5 Only the ø4 mm or ø6 mm elbow type One-touch fitting is applicable.

# Improved Operability

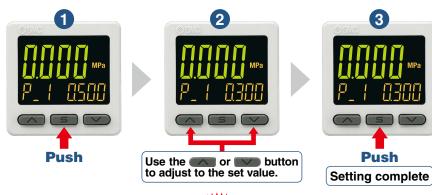

# **Visualization of Settings** The sub screen (label) shows the item to be set. ZSE20□(F)/ISE20□ **Current model Switches** between displays Always on one screen

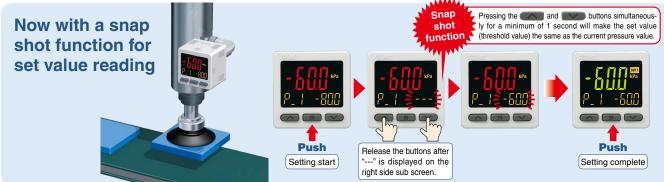

3

# Simple 3-Step **Setting**

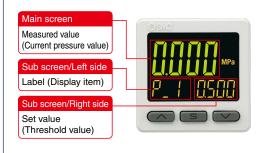

When the S button is pressed and the set value (P\_1) is being displayed, the set value (threshold value) can be set. When the S button is pressed and the hysteresis (H\_1) is being displayed, the hysteresis value can be set.

# **Easy Screen Switching**

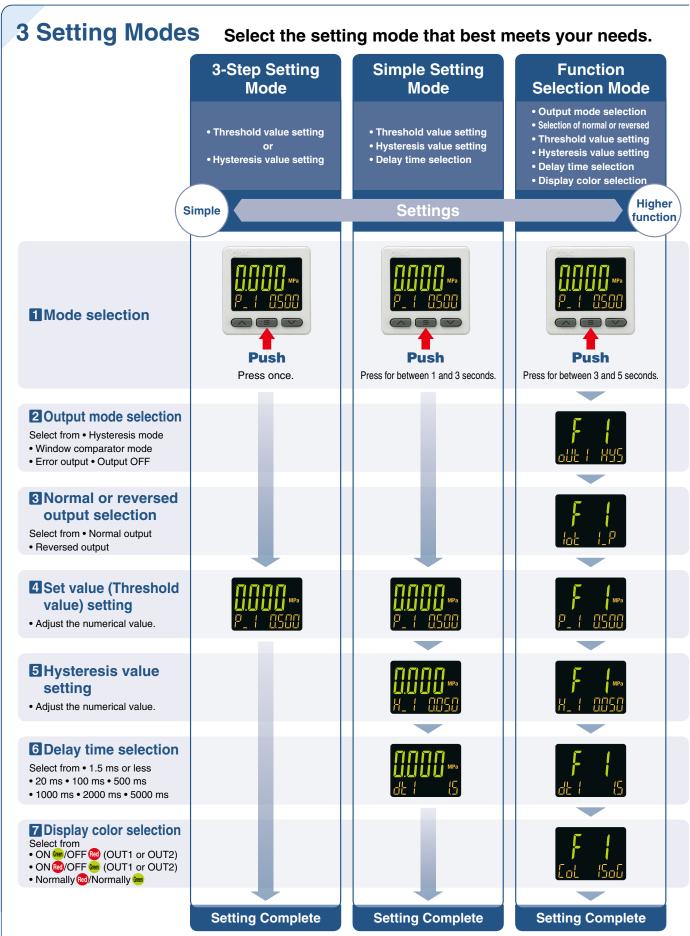

It is possible to change the settings while checking the measured value.

- \* One additional arbitrary display mode can be added via the function settings. (Refer to p. 3.)
- \* Example for 1 output

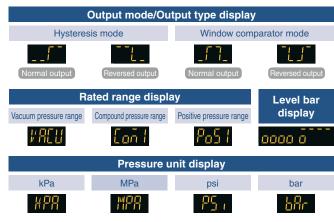

# Improved Operability

# **Other Sub Screen Display**

The peak value or bottom value, or both values can be displayed on one screen!

\* Peak and bottom values are maintained even if the power supply is cut.

 A combination of the displays shown above and the set values can be displayed on the 2 sub screens.

# Delay Time 1.5 ms or less

\*1 Select from 1.5 ms or less, 20 ms, 100 ms, 500 ms, 1000 ms, 2000 ms, or 5000 ms.

# **Convenient Functions**

p. **17, 26** 

Functions	Copy function	Auto-shift function	Security code	Power saving mode	Resolution switch function	MPa/kPa switch function
20	_	_	•	•	•	•
20A	•	•	•	•	•	•
20B	•	•	•	•	•	•
20B-L	_	_	•	•	•	•
20C	•	•	•	•	•	•

#### Copy function

The settings of the master sensor can be copied to the slave sensors.

#### Auto-shift function

This measures the pressure at the time of external input and uses it as a reference to correct the on-off point of the switch.

#### Security code

The key locking function keeps unauthorized persons from tampering with the settings.

#### Power saving mode

Power consumption is reduced by turning off the monitor.

Series	Current consumption	Reduction rate*1		
20	25 mA or less	Approx. 60% reduction		
20A		400/		
20B(-L)	35 mA or less	Approx. 40% reduction		
20C				

\*1 In power saving mode

# Display resolution switch

function

Reduces monitor flickering

(Only the displayed values are changed; the accuracy remains the same.)

#### MPa/kPa switch function

Vacuum, compound, and/or positive pressure can be displayed in MPa or kPa.

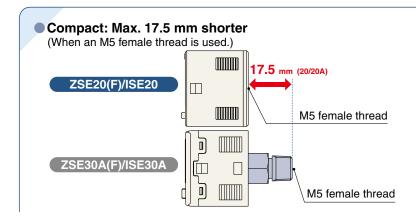

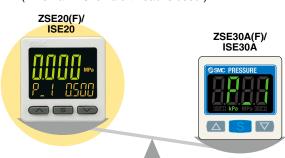

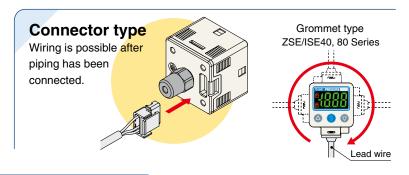

# Compact & Lightweight

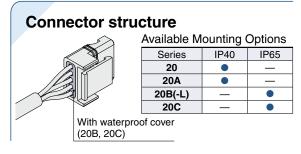

Lightweight: Max. 21 g lighter (When an M5 female thread is used.)

# IO-Link Compatible ZSE20B(F)-L/ISE20B-L 5.15

# Visualization of operation/equipment status/Remote monitoring and control by communication

#### Configuration File (IODD File\*1)

•Manufacturer •Product part no. •Set value

#### \*1 IODD File:

IODD is an abbreviation of IO Device Description. This file is necessary for setting the device and connecting it to a master. Save the IODD file on the PC to be used to set the device prior to use.

IO-Link is an open communication interface technology between the sensor/actuator and the I/O terminal that is an international standard, IEC61131-9.

IO-Link Compatible Device ZSE20B(F)-L/ISE20B-I

#### Read the device data.

- •Switch ON/OFF signal and analog value
- Device information:
- Manufacturer, Product part number, Serial number, etc.
- Normal or abnormal device status
- Cable breakage

**IO-Link Master** 

0.-.0

0.-0

## Implement diagnostic bits in the process data.

The diagnostic bit in the cyclic process data makes it easy to find problems with the equipment.

**Device settings** 

master.

etc.

•Threshold value

·Operation mode,

can be set by the

It is possible to find problems with the equipment in real time using the cyclic (cycle) data and to monitor such problems in detail with the noncyclic (aperiodic) data.

#### **Process Data**

Bit offset	Item	Note		
0	OUT1 output	0: OFF 1: ON		
1	OUT2 output	0: OFF 1: ON

Yes COM*1	COM*'	*2	IO-Link mode	Abnormal	Version does not match	Er 15	IO-Link version does not match that of the master.  The master uses version 1.0.  * The applicable IO-Link version is 1.1.
		(Flashing)			Lock	ModE LoC	Back-up and re-store required due to data storage lock
No	OFF				Communication disconnection	ModE oPE ModE SErE ModE PrE	Normal communication was not received for 1 second or longer.
		OFF	S	SIO mode		ModE 5 io	General switch output

<sup>\*1</sup> The COM indicator is ON when communication with the master is established. \*2 In IO-Link mode, the IO-Link indicator is ON or flashes. \*3 When the sub screen is set to Mode

# For General Fluids ZSE20C(F)/ISE20C(H) p.24

# **Stainless Diaphragm**

Oil-free (Single-layer diaphragm structure)

Sensor unit: Stainless steel 630 Fitting parts: Stainless steel 304

A stainless steel 316L option is also available for the sensor unit and fitting parts.

# Leakage

1 x 10<sup>-10</sup> Pa·m<sup>3</sup>/s

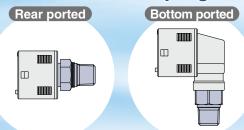

<Face seal and compression fitting>

**Enclosure: IP65** 

# 1 x 10<sup>-5</sup> Pa·m<sup>3</sup>/s

<Threaded type (R, Rc, NPT, G)>

# **Select from 2 Piping Directions.**

## Welded structure for sensor units and fitting parts

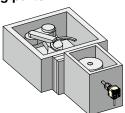

Select from a face seal or compression fitting.

Face seal

Confirmation of the atmospheric pressure of a load lock chamber

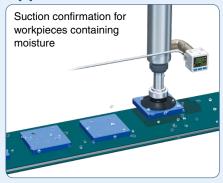

# Applicable Fluid Examples

- Water
- Argon
- Hydraulic fluid (JIS-K2213)
- Silicone oil (JIS-K2213)
- Lubricant (UC KCOO1)
- Lubricant (JIS-K6301)

Fluorocarbon

- Carbon dioxideAir-containing
- drainage
  Nitrogen

## **Applications**

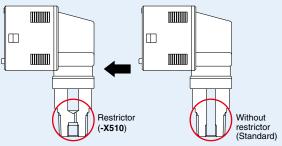

#### **Made to Order**

#### Parts in Contact with Fluid: Stainless Steel 316L

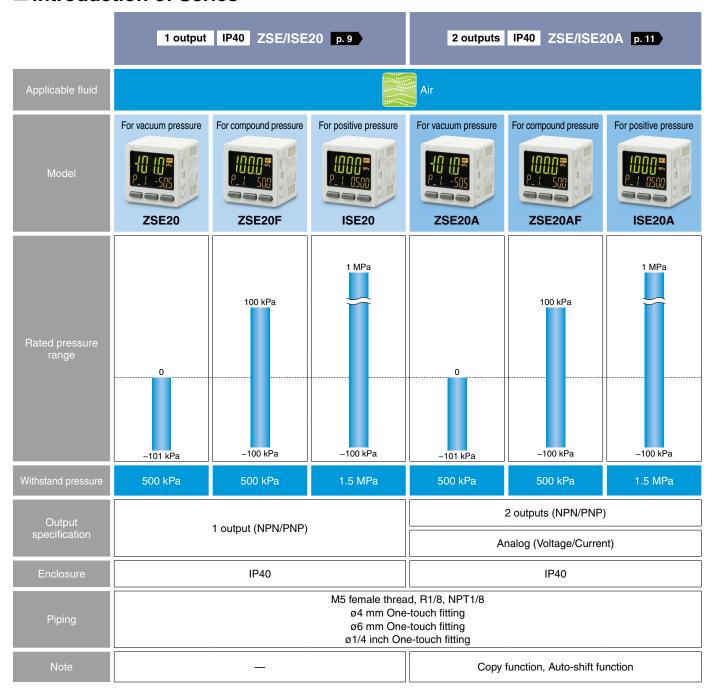

This pressure switch has increased corrosion resistance due to the use of stainless steel 316L for the parts in contact with fluid (pressure sensor and fitting).

# ■ Restrictor-installed Fitting (-X510)

A pressure switch that has a restrictor installed in the fitting is available to prevent the sensor from being damaged by water hammer or fluid inertia. (Refer to p. 38 for details.)

p. 19 "Dimensions" 

From p. 20

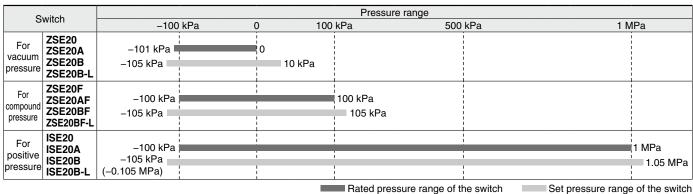

# $ZSE20\square(F)/ISE20\square$ Series

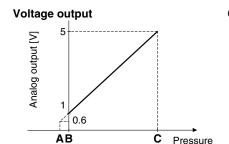

#### Set Pressure Range and Rated Pressure Range

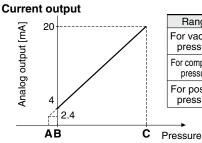

#### Set the pressure within the rated pressure range.

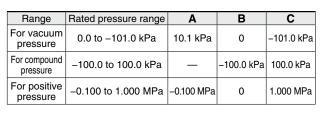

The set pressure range is the range of pressure within which setting is possible. The rated pressure range is the range of pressure that satisfies the specifications (accuracy, linearity, etc.) of the switch. Although it is possible to set a value outside the rated pressure range, the specifications cannot be guaranteed even if the value stays within the set pressure range.

## **Functions**

Sub screen setting function	The display of the sub screen can be selected.		
Auto-preset function	This function calculates a rough set value automatically based on the on-going operation.		
Display value fine adjustment function	Evens out deviations in the displayed value		
Peak value indication function	Can retain the maximum pressure value displayed during measurement		
Bottom value indication function	Can retain the minimum pressure value displayed during measurement		
Keylock function (Selectable security code)	The keyboard can be locked to prevent the accidental operation of the operation switch.		
Zero-clear function	The pressure display can be set to zero when the pressure is open to the atmosphere.		
Error indication function	This function displays the error location and content when a problem or error has occurred.		
Anti-chattering function	Prevents possible malfunctions due to sudden fluctuations in the primary pressure by adjusting the delay time		
Units selection function	Can convert the display value		
Power saving mode	Reduces power consumption		
Display resolution switch function	Converts the display resolution from the normal value of 1/1000 to 1/100  Can reduce flickering of the monitor		
kPa ↔ MPa switch function	Converts the unit between kPa and MPa		
Copy function*1	The settings of the master sensor can be copied to the slave sensors.		
Auto-shift function*1	Measures the pressure at the time of external input and uses it as a reference to correct the set value of the switch

	Input type	•	Non-voltage input: 0.4 V or less				
Auto-shift	Input mod		Select from Auto-shift or Auto-shift zero.				
input	Input time	)	5 ms or more				
	Unit*3		MPa, kPa, kgf/cm²,	par, psi, inHg, mmHg	g, mmHg MPa, kPa, kgf/cm², bar, psi		
	Display type		LCD				
	Number of screens		3-screen display (Main screen, Sub screen x 2)				
Display	Display color		Main screen: Red/Green     Sub screen: Orange				
	Number of display digits		Main screen: 4 digits (7 segments)     Sub screen: 4 digits (Upper 1 digit 11 segments, 7 segments for other)				
Indicator light		Lights up when switch output is turned ON (OUT1, OUT2: Orange)					
Digital filter*4		0, 10, 50, 100, 500, 1000, 5000 ms					
	Enclosure		IP65				
	Withstand voltage		250 VAC for 1 minute between terminals and housing				
Environment	Insulation	resistance	$2\mathrm{M}\Omega$ or more (50 VDC measured via megohmmeter) between terminals and housing				
	Operating	temperature range	Operating: -5 to 50°C, Stored: -10 to 60°C (No condensation or freezing)				
	Operating	humidity range	Operating/Stored: 35 to 85%RH (No condensation)				
Standards		UL/CSA (E216656), CE marking (EMC directive/RoHS directive)					
Length of lead	Length of lead wire with connector			2 m			
		(at 0 ma)					

- \*1 Value without digital filter (at 0 ms)
- \*2 If the applied pressure fluctuates around the set value, the hysteresis must be set to a value greater than the amount of fluctuation, or chattering will occur.
- \*3 Setting is only possible for models with the units selection function. Only MPa or kPa is available for models without this function.
- $\ast 4\,$  The response time indicates when the set value is 90% in relation to the step input.
- \* Products with tiny scratches, marks, or display color or brightness variations which do not affect the performance of the product are verified as conforming products.

## Set Pressure Range and Rated Pressure Range

#### Set the pressure within the rated pressure range.

The set pressure range is the range of pressure within which setting is possible. The rated pressure range is the range of pressure that satisfies the specifications (accuracy, linearity, etc.) of the switch. Although it is possible to set a value outside the rated pressure range, the specifications cannot be guaranteed even if the value stays within the set pressure range.

## Analog Output

## **Functions**

В

C

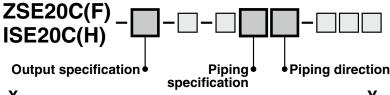

Pressure

В

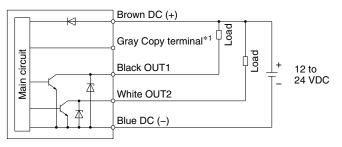

Sub screen setting function	The display of the sub screen can be selected.					
Auto-preset function	This function calculates a rough set value automatically based on the on-going operation.					
Display value fine adjustment function	Evens out deviations in the displayed value					
Peak value indication function	Can retain the maximum pressure value displayed during measurement					
Bottom value indication function	Can retain the minimum pressure value displayed during measurement					
Keylock function (Selectable security code)	The keyboard can be locked to prevent the accidental operation of the operation switch.					
Zero-clear function The pressure display can be set to zero when the pressure is open to the atmost						
Error indication function	This function displays the error location and content when a problem or error has occurred.					
Anti-chattering function	Prevents possible malfunctions due to sudden fluctuations in the primary pressure by adjusting the delay time					
Units selection function	Can convert the display value					
Power saving mode	Reduces power consumption					
Display resolution switch function	Converts the display resolution from the normal value of 1/1000 to 1/100					
Display resolution switch function	Can reduce flickering of the monitor					
kPa ↔ MPa switch function	Converts the unit between kPa and MPa					
Copy function	The settings of the master sensor can be copied to the slave sensors.					
Auto-shift function	Measures the pressure at the time of external input and uses it as a reference to correct the set value of the switch

## **Dimensions**

NPT1/4

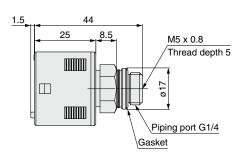

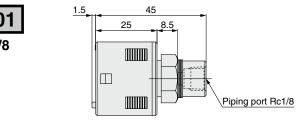

If there is a possibility that the atmospheric vent port of the switch will be exposed to water or dust, insert a tube into the atmospheric vent port and route the other end of the tube to a safe place away from water or dust.

- \* For tubing, please use the SMC TU0425 (polyurethane, O.D. ø4, I.D. ø2.5) for the pressure switch.
- \* If it is expected that the pressure, such as water hammer or surge pressure, will fluctuate rapidly, refer to the precautions in the Operation Manual on the SMC website (http://www.smcworld.com).

# ZSE20□(F)/ISE20□ Series Function Details

Display examples of the main and sub (set value) screens of each mode. (For ISE20□ (for Positive pressure))

# $ZSE20\square(F)/ISE20\square$ Series

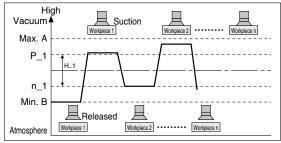

## **Function Details**

The  $F\square$  in ( ) shows the function code number. Refer to the operation manual for details about operation procedures and function codes. Click **here** for details.

#### A Auto-preset function (F4)

Auto-preset function, when selected in the initial setting, calculates and stores the set value from the measured pressure. For example, if this function is used for suction verification, the optimum set value is determined automatically by performing suction and release of several workpieces.

#### **Suction Verification**

 When using with IO-Link, the set values cannot be changed by communication.

#### Formula for Obtaining the Set Value

P_1 or n_1	H_1
P_1=A-(A-B)/4 n_1=B+(A-B)/4	H_1= (A-B)/2

#### **B** Display value fine adjustment function (F6)

Fine adjustment of the indicated value of the pressure sensor can be made within the range of  $\pm 5\%$  of the read value. (The scattering of the indicated value can be eliminated.)

Indicated value at the time of shipment
 Adjustable range of display value fine adjustment function

When the display value fine adjustment function is used, the set pressure value may change ±1 digit.

## C Peak/Bottom value display

This function constantly detects and updates the maximum (minimum) pressure when the power is supplied, and allows to hold the maximum (minimum) pressure value.

The held value is maintained even if the power supply is cut.

When the s and v buttons are simultaneously pressed for 1 second or longer, while "holding", the held value will be reset.

## D Keylock function

Prevents operation errors such as accidentally changing setting values

#### **Zero-clear function**

This function clears and resets the zero value on the display of measured pressure.

The indicated value can be adjusted within  $\pm 7\%$  F.S. of the pressure when ex-factory. (ZSE20 $\Box$ F (for compound pressure):  $\pm 3.5\%$  F.S.)

## Error display function

When an error or abnormality arises, the location and contents are displayed.

Error name	Error code	Description	Action	
Over current error	Er 1 Er 2	Load current of 80 mA or more is applied to the switch output.	Turn the power off and remove the cause of the over current. Then supply the power again.	
Residual pressure error	[r]	During zero-clear operation, pressure over $\pm 7\%$ F.S. ( $\pm 3.5\%$ F.S. for compound pressure) is present. Note that the mode is returned to measurement mode automatically 1 second later. The zero clear range varies by $\pm 1\%$ F.S. due to variation between individual products.	Perform zero-clear operation again after restoring the applied pressure to an atmospheric pressure condition.	
Applied	XXX	Supply pressure exceeds the maximum set pressure.	Reset applied pressure to a level	
pressure error			within the set pressure range	
System error	Er 0 Er 7 Er 6 Er 9	Internal data error	Turn the power off and then on again. If the failure cannot be solved, please contact SMC for investigation.	
Copy error	Er 13	The copy function does not operate properly.	After clearing the error by pressing the and buttons simultaneously for a minimum of 1 second, check the wiring and the model, and then attempt to copy again.	
IO-Link master version error	Er 15	IO-Link version does not match that of the master.	Ensure that the master IO-Link version matches the device version.	

If the error cannot be reset after the above measures are taken, or errors other than those above are displayed, please contact SMC for investigation.

# Function Details **ZSE20** (F)/ISE20 Series

**Function Details** 

The  $F\square$  in ( ) shows the function code number. Refer to the operation manual for details about operation procedures and function codes. Click here for details

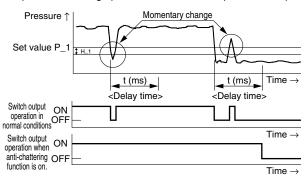

#### G Anti-chattering function (Simple setting mode or F1)

A large bore cylinder or ejector consumes a large volume of air in operation and may experience a temporary drop in the supply pressure. This function prevents detection of such temporary drops in the supply pressure as an error by changing the delay time setting.

Available delay time settings					
1.5 ms or less, 20 ms, 100 ms, 500 ms, 1000 ms, 2000 ms, 5000 ms					

#### <Principle>

This function averages pressure values measured during the response time set by the user and then compares the average pressure value with the pressure set point value to output the result on the switch.

## H Units selection function (F0)

Display units can be switched with this function.

Display unit	MPA	kPA	kGF	bAr	PSi	inCH	mmHG
Smallest settable increment	MPa*1	kPa	kgf/cm <sup>2</sup>	bar	psi	inHg	mmHg
ZSE20□ (Vacuum pressure)	0.001	0.1	0.001	0.001	0.01	0.1	1
ZSE20□F (Compound pressure)	0.001	0.1	0.001	0.001	0.02	0.1	1
ISE20□ (Positive pressure)	0.001	1	0.01	0.01	0.1		
ISE20□H (Positive pressure)	0.001	1	0.01	0.01	0.2		

<sup>\*1</sup> The ZSE20 (vacuum pressure) and ZSE20 F (compound pressure) will have different setting and display resolution when the unit is set to MPa.

## Selection of power saving mode (F80)

The power saving mode can be selected.

It shifts to the power saving mode without button operation for 30 seconds.

It is set to the normal mode (Power saving mode is OFF.) at a time of shipment from the factory.

(During power saving mode, [ECo] will flash in the sub screen and the operation light will be ON (only when the switch is ON).)

## J Setting of security code (F81)

The user can select whether a security code must be entered to release the key lock.

At a time of shipment from the factory, it is set such that a security code is not required.

# $ZSE20\square(F)/ISE20\square$ Series

## **Function Details**

The  $F\square$  in ( ) shows the function code number. Refer to the operation manual for details about operation procedures and function codes. Click **here** for details.

## K Copy function (F97) (Z/ISE20A, 20B, 20C series only)

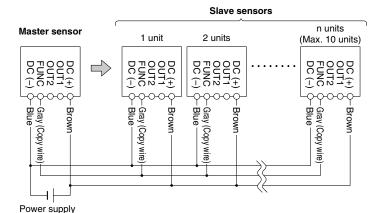

The settings of the master sensor can be copied to the slave sensors, reducing setting labor and minimizing the risk of setting mistakes.

The set value can be copied to up to 10 switches simultaneously.

(Maximum transmission distance: 4 m)

\* This function is not provided with the IO-Link compatible type.

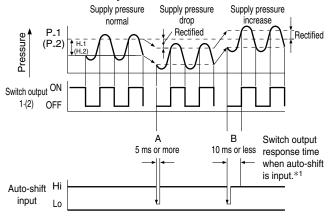

- 1) Wire as shown in the figure on the left.
- Select the slave sensor which is to be the master, and change it into a master using the buttons. (In the default setting, all sensors are set as slaves.)
- 3) Press the sutton on the master sensor to start copying.

## L Auto-shift function (F5) (Z/ISE20A, 20B, 20C series only)

When there are large fluctuations in the supply pressure, the switch may fail to operate correctly. The auto-shift function compensates for such supply pressure fluctuations. It measures the pressure at the time of auto-shift signal input and uses it as the reference pressure to correct the set value on the switch.

#### Set value correction by auto-shift function

\*1 When delay time is 1.5 ms or less

When the auto-shift function is selected, " $\Re \Sigma_{\text{in}=0.00}$ " will be displayed on the sub screen for about 1 second, and the pressure value at that point will be saved as reference value " $\Gamma_-$ 5." Based on the saved reference value, output on-off points controlled by set values\*2 such as " $P_-$ 1," " $P_-$ 2," and " $P_-$ 2," will also be rectified.

\*2 When an output is reversed, output on-off points displayed at "\_\_ !," " $_{-}$  !," " $_{-}$  !," "\_\_ ?," and " $_{+}$  . [" will be rectified.

The above is an example in hysteresis mode. On-off points are similarly rectified in window comparator mode. Outputs that enable the auto-shift function can be changed via the settings.

\* This function is not provided with the IO-Link compatible type.

#### **Settable Range for Auto-Shift Input**

	Set pressure range	Settable range	
Compound pressure	-105.0 to 105.0 kPa	–210 to 210 kPa	
Vacuum pressure	10.0 to -105.0 kPa	115.0 to -115.0 kPa	
Positive pressure	-0.105 to 1.050 MPa	-1.155 to 1.155 MPa	
Positive pressure*3	-0.105 to 2.100 MPa	-2.20 to 2.205 MPa	

\*3 Z/ISE20C series only

#### Auto-shift zero

The basic function of auto-shift zero is the same as that of auto-shift. However, it corrects values on the display based on a pressure value of "!", which is set as the reference value when auto-shift function is selected.

 $ZSE20\square(F)/ISE20\square$  Series **Made to Order** 

Please contact SMC for detailed dimensions, specifications, and delivery times.

# Parts in Contact with Fluid: Stainless Steel 316L

This pressure switch has better corrosion resistance because it uses stainless steel 316L for the parts in contact with fluid (pressure sensor and fitting).

#### How to Order

ZSE20C(F)/ISE20C -			]-[		X500
Enter the standard product number.	(Refer to	p. 24.)			

- \* Not applicable to the rated pressure -0.1 to 2 MPa specifications (ISE20CH).
- \* A restrictor (equivalent to -X510) is installed inside the fitting. (Piping specifications A2(L) and B2(L) are excluded.)

#### **Specifications**

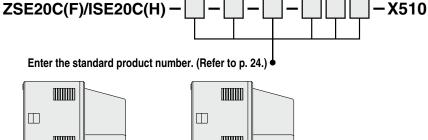

Model	ZSE20C(F)	ISE20C				
Withstand pressure	500 kPa	1.5 MPa				
Applicable fluid	Liquids and gases do not corrode stainless steel 316					

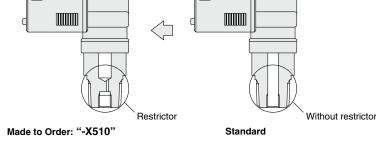

Models other than those above have the same specifications as the standard product.

# Restrictor-installed Fitting

A restrictor is installed inside the fitting in order to reduce the effects of water collision with inertia force in the piping when adsorption is broken.

#### **How to Order**

- Not applicable for piping specifications A2(L) and B2(L).
- There are cases in which this product will not effectively suppress of the effects of water hammer. It is advised that other measures be taken in such cases

# **Lead Wire with M12 Connector**

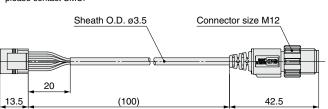

A lead wire applicable to the M12 4-pin pre-wired connector The lead wire length is 100 mm.

Z/ISE30A- <b>F</b> -□□□□	PNP open collector 1 output + Analog current output	Z/ISE20A- <b>V</b> -□-□-□□□	

<sup>\*</sup> While this conversion cable allows for use of the existing wiring, output and functions other than that of the Z/ISE30A will be invalid (not wired).

# **⚠** Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)\*1), and other safety regulations.

Caution: Caution indicates a hazard with a low level of risk which, If not avoided, could result in minor or moderate injury.

Warning: Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

⚠ Danger: Danger if not avoided, will result in death or serious injury. **Danger** indicates a hazard with a high level of risk which, \*1) ISO 4414: Pneumatic fluid power - General rules relating to systems.

ISO 4413: Hydraulic fluid power – General rules relating to systems.

IEC 60204-1: Safety of machinery - Electrical equipment of machines. (Part 1: General requirements)

ISO 10218-1: Manipulating industrial robots - Safety.

## **⚠Warning**

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

- 3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.
  - 1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
  - 2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
  - 3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.
- 4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.
  - 1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
  - 2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalog.
  - 3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
  - 4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

#### **⚠** Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.

If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary. If anything is unclear, contact your nearest sales branch.

## Limited warranty and Disclaimer/ **Compliance Requirements**

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".

Read and accept them before using the product.

#### **Limited warranty and Disclaimer**

- 1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.\*2) Also, the product may have specified durability, running distance or
  - replacement parts. Please consult your nearest sales branch.
- 2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
- 3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.
  - 2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.

Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

#### Compliance Requirements

- 1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
- 2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

## **⚠** Caution

#### SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

#### **Revision History**

Edition B \* New variations (for general fluids, IP65, 2 outputs, and analog output) have been added.

\* Number of pages has been increased from 16 to 36.

VX

Edition C \* The IO-Link compatible type has been added.

\* Number of pages has been increased from 36 to 40.

WR
