## 2-Color Display High-Precision Digital Pressure Switch

## ZSE40A(F)/ISE40A Series

Piping Variations
Space-saving

Mounting Variations

## Series

## Secret code setting function

A function to prevent operation by anyone other than the designated operator while the keys are locked.

An optional 3-digit value is entered.

* The set-value can be checked while the keys are locked.

## Power-saving function

The display can be turned off to save the power consumption.
(Power consumption reduced by max. 20\%)

The value disappears and decimal points start flashing.

## Resolution conversion function

The flickering on the display can be eliminated.

(Only the displayed value is changed, and there is no effect on the accuracy.)

## $\mathrm{MPa} / \mathrm{kPa}$ switching function

The indication unit for vacuum, compound pressure and positive pressure can be integrated into either MPa or kPa .

kPa Stick the label (enclosed with the product) of a desired unit seal.

## 2-Color Display High-Precision ( $\boldsymbol{\epsilon}_{\mathrm{c}} \mathbf{M M}_{\text {us }}$ Digital Pressure Switch

## ZSE40A(F)/ISE40A Series

The ZSE40A(F)/ISE40A series now features a new model: the ZSE20B(F)/ISE20B. Click here for details.

How to Order [For M8 (3 pins) connector]

## 2-Color Display High-Precision Digital Pressure Switch

 refer to the Operation Manual on the SMC website, http://www.smcworld.com Click here for details.Specifications

| Model |  |  |  | ZSE40A (vacuum pressure) | ZSE40AF (compound pressure) | ISE40A (positive pressure) |

| Applicable fluid |  |  |  | Air, Non-corrosive gas, Non-flammable gas |  |  |
| Power supply voltage |  |  |  | 12 to 24 VDC $\pm 10 \%$, Ripple (p-p) $10 \%$ or less (with power supply polarity protection) |  |  |
| Current consumption |  |  |  | 45 mA or less |  |  |
| Switch output |  |  |  | NPN or PNP open collector 1 output or 2 outputs |  |  |
| Maximum load current |  |  |  | 80 mA |  |  |
| Maximum applied voltage |  |  |  | 28 V (at NPN output) |  |  |
| Residual voltage |  |  |  | 1 V or less |  |  |
| Response time |  |  |  | 2.5 ms (with anti-chattering function: $20,100,500,1000,2000 \mathrm{~ms}$ ) |  |  |
| Short circuit protection |  |  |  | Yes |  |  |
| Repeat accuracy |  |  |  | $\pm 0.2 \%$ F.S. $\pm 1$ digit |  |  |
| Hysteresis | Hysteresis mode |  |  | Variable (0 or above) ${ }^{\text {Note 1) }}$ |  |  |
|  | Window comparator mode |  |  |  |  |  |
| Analog output | Note 2) <br> Voltage output |  | Output voltage <br> (Rated pressure range) | 1 to $5 \mathrm{~V} \pm 2.5 \% \mathrm{~F} . \mathrm{S}$. |  | 0.6 to $5 \mathrm{~V} \pm 2.5 \%$ F.S. |
|  |  |  | Linearity | $\pm 1 \%$ F.S. |  |  |
|  |  |  | Output impedance | Approx. $1 \mathrm{k} \Omega$ |  |  |
|  | Note 3) <br> Current output |  | Output current <br> (Rated pressure range) | 4 to 20 mA | $\pm 2.5 \%$ F.S. | 2.4 to $20 \mathrm{~mA} \pm 2.5 \%$ F.S. |
|  |  |  | Linearity | $\pm 1 \%$ F.S. |  |  |
|  |  |  | Load impedance | Maximum load impedance: $300 \Omega$ (Power supply voltage 12 V )$600 \Omega$ (Power supply voltage 24 V )Minimum load impedance: $50 \Omega$ |  |  |
| Auto-shift input |  |  |  | Non-voltage input (Reed or Solid state), Low level: 0.4 V or less, 5 ms or longer input |  |  |
| Display |  |  |  | 3 1/2-digit, 7-segment, 2-color LCD (Red/Green) |  |  |
| Display accuracy |  |  |  | $\pm 2 \%$ F.S. $\pm 1$ digit (Ambient temperature of $25 \pm 3^{\circ} \mathrm{C}$ ) |  |  |
| Indicator light |  |  |  | Lights up when output is turned ON. OUT1, OUT2: Orange |  |  |
| Environment |  | Enclosure |  | IP65 |  |  |
|  |  | Operating temperature range ${ }^{\text {Note 4) }}$ |  | Operating: -5 to $50^{\circ} \mathrm{C}$, Stored: -10 to $60^{\circ} \mathrm{C}$ (No freezing or condensation) |  |  |
|  |  | Operating humidity range |  | Operating/Stored: 35 to 85\% RH (No condensation) |  |  |
|  |  | Withstand voltage |  | 1000 VAC for 1 minute between terminals and housing |  |  |
|  |  | Insulation resistance |  | $50 \mathrm{M} \Omega$ or more ( 500 VDC measured via megohmmeter) between terminals and housing |  |  |
| Temperature characteristics |  |  |  | $\pm 2 \%$ F.S. ( $25^{\circ} \mathrm{C}$ reference) |  |  |
| Lead wire |  |  |  | Oilproof heavy-duty vinyl cable 5 cores$\varnothing 3.5,2 \mathrm{~m}$ Conductor area: $0.15 \mathrm{~mm}^{2}$ (AWG26) Insulator O.D.: 0.95 mm |  |  |
| Standards |  |  |  | CE, UL/CSA (E216656), RoHS |  |  |

Note 1) If the applied pressure fluctuates around the set-value, the hysteresis must be set to a value more than the fluctuating width, otherwise chattering will occur. Note 2) When the analog voltage output is selected, the analog current output cannot be selected.
Note 3) When the analog current output is selected, the analog voltage output cannot be selected
Note 4) UL temperature rating: The maximum ambient temperature is $50^{\circ} \mathrm{C}$.

## ZSE40A(F)/ISE40A Series

## Set Pressure Range and Rated Pressure Range

## Set the pressure within the rated pressure range.

The set pressure range is the range of pressure that is possible in setting.
The rated pressure range is the range of pressure that satisfies the specifications (accuracy, linearity, etc.) on the switch.
Although it is possible to set a value outside the rated pressure range, the specifications will not be guaranteed even if the value stays within the set pressure range.

| Switch |  | Pressure range |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | -100 kPa | 0 | 100 kPa | 500 kPa | 1 MPa |
| For vacuum pressure | ZSE40A | $\begin{aligned} & -101.3 \mathrm{kPa} \\ & -105 \mathrm{kPa} \end{aligned}$ | $0$ |  |  |  |
| For compound pressure | ZSE40AF | $\begin{array}{r} -100 \mathrm{kPa} \\ -105 \mathrm{kPa} \end{array}$ |  | 100 kPa <br> 105 kPa |  | , |
| For positive pressure | ISE40A | $-100 \mathrm{kPa}$ <br> $-105 \mathrm{kPa}$ <br> ( -0.105 MPa ) | $\begin{gathered} 1 \\ \vdots \\ \vdots \\ \hline \end{gathered}$ |  |  | 1 MPa <br> 1.05 MPa |

## Panel fitting dimensions

Note) This is the minimum value for the piping method 01 or N01.
Take the piping material and tubing into account for design. When the corner is to have radius, it must be R3 or less.

## 2-Color Display High-Precision Digital Pressure Switch

## Function Details

The F $\square$ in ( ) shows the function code number. Refer to the Operation Manual for the details of operation procedures and function codes. Click here for details.

## A Copy function (F97)

The settings of the master sensor can be copied to the slave sensors, reducing setting labor and minimizing risk of mistakes in setting.
Can copy to up to 10 switches simultaneously.
(Maximum transmission distance 4 m )

1) Wire as shown in the left figure.
2) Select the slave switch which is to be the master, and change it into a master using the buttons. (In the default setting, all switches are set as slaves.)
3) Press the (S) button of the master switch to start copying.

Formula for Obtaining the Set-Value

| P_1 or P_2 | H_1 or H_2 |
| :---: | :---: |
| P_1 (P_2) $=A-(A-B) / 4$ |  |
| $n \_1\left(n \_2\right)=B+(A-B) / 4$ | $H \_1\left(H \_2\right)=\|(A-B) / 2\|$ |

## D Peak/Bottom value indication

This function constantly detects and updates the maximum (minimum) value and allows to hold the maximum (minimum) pressure value.
When the © ( ) buttons are simultaneously pressed for 1 second or longer, while "holding", the hold value will be reset.

## E Keylock function

Prevents operation errors such as accidentally changing setting values.

## F Zero-clear function

This function clears and resets the zero value on the display of measured pressure.
For the pressure switch with analog output, the analog output shifts according to the indication. The indicated value can be adjusted within $\pm 7 \%$ F.S. of the pressure when ex-factory. (ZSE40AF (for compound pressure) $\pm 3.5 \%$ F.S.)

## ZSE40A(F)/ISE40A Series

## Function Details

## G Error indication function

| Error name | Error code | Description | Action |
| :---: | :---: | :---: | :---: |
| Overcurrent error | Eri | Load current of 80 mA or more is applied to the switch output (OUT1). | Eliminate the cause of the over current by turning off the power supply, and then turn on it again. |
|  | ErI | Load current of 80 mA or more is applied to the switch output (OUT2). |  |
| Residual pressure error | ErJ | During zero-clear operation, pressure over $\pm 7 \%$ F.S. is applied. (ZSE40AF (compound) $\pm 3.5 \%$ F.S.) <br> After 1 second, the mode will reset to measurement mode. $\pm 1 \%$ F.S. of the zero-clear range varies between individual products. | Perform zero-clear operation again after restoring the applied pressure to an atmospheric pressure condition. |
| Applied pressure error | HHH | Supply pressure exceeds the maximum set pressure. | Reset applied pressure to a level within the set pressure range. |
|  | LLL | Supply pressure is below the minimum set pressure. |  |
| Auto-shift error | 0.0 | The value measured at the time of auto-shift input is outside the set pressure range. <br> * After displaying the error code for about 1 second, the switch returns to the measuring mode. | The controller does not respond to the auto-shift signal. Check the equipment and machinery for this point. |
| System error | ErI | Internal data error | Turn off the power supply and then turn on it again. If the failure cannot be solved, please contact SMC for investigation. |
|  | $E \sim 4$ |  |  |
|  | ErE |  |  |
|  | $E r$ |  |  |
|  | Erg |  |  |
|  | $E r g$ |  |  |

If the failure cannot be solved after the above instructions are performed, please contact SMC for investigation.

## H Anti-chattering function (F3)

A large bore cylinder or ejector consumes a large volume of air in operation and may experience a temporary drop in the supply pressure. This function prevents detection of such temporary drops in the supply pressure as an error.

Available response time settings
$20 \mathrm{~ms}, 100 \mathrm{~ms}, 500 \mathrm{~ms}, 1000 \mathrm{~ms}, 2000 \mathrm{~ms}$

## <Principle>

This function averages pressure values measured during the response time set by the user and then compares the average pressure value with the pressure set point value to output the result on the switch.

I Display unit switching function (FO)
Display units can be switched with this function.

| Minimum unit setting | P\% |  | [15 | bR1\% | 95 1 | 1 nH | กัก゙号 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | kPa | MPa* | kgf/ $\mathrm{cm}^{2}$ | bar | psi | inHg | mmHg |
| ZSE40A (vacuum pressure) | 0.1 | 0.001 | 0.001 | 0.001 | 0.01 | 0.1 | 1 |
| ZSE40AF (compound pressure) | 0.1 | 0.001 | 0.001 | 0.001 | 0.02 | 0.1 | 1 |
| ISE40A (positive pressure) | 1 | 0.001 | 0.01 | 0.01 | 0.1 |  |  |

* The ZSE40A (vacuum pressure) and ZSE40AF (compound pressure) will have different setting and display resolution when the unit is set to MPa.

## 2-Color Display High-Precision Digital Pressure Switch

## J Power-saving mode (F80)

Power-saving mode can be selected.
It shifts to the power-saving mode without button operation for 30 seconds. It is set to the normal mode (Power-saving mode is OFF.) when ex-factory. (Decimal points and operation indicator light (only when the switch output is turned ON.) blink in the power-saving mode.)

## K Setting of secret code (F81)

Users can select whether a secret code must be entered to release key lock. At the time of shipment from the factory, it is set such that the secret code is not required.

## L Auto-shift function (F5)

When there are large fluctuations in the supply pressure, the switch may fail to operate correctly. The auto-shift function compensates such supply pressure fluctuations. It measures the pressure at the time of auto-shift signal input and uses it as the reference pressure to correct the set-value on the switch.

Set-value correction by auto-shift function

* Rectified value

When the auto-shift is selected, "ooo" will be displayed for about 1 second, and the pressure value at that point will be saved as a rectified value "L_5". Based on the saved rectified values, the set-value Note) of "P_l", " $H_{-} l$ ", "P_ ${ }^{2}$ ", and " $H_{-}$" " will likewise be rectified.

Note) When an output is reversed, " $n_{-} 1$ ", "H_ I", " $n_{-}$"", "H_ $H^{\prime}$ " will be rectified.

Settable Range for Auto-Shift Input

|  | Set pressure range | Settable range |
| :---: | :---: | :---: |
| Compound pressure | -105.0 to 105.0 kPa | -210 to 210 kPa |
| Vacuum pressure | 10.0 to -105.0 kPa | 115.0 to -115.0 kPa |
| Positive pressure | -0.105 to 1.050 MPa | -1.155 to 1.155 MPa |

## Auto-shift zero

The basic function of auto-shift zero is the same as the function for auto-shift. Also, it corrects values on the display, based on a pressure value of " $\square$ ", when the auto-shift is selected.
